BUDGET ALLOCATION MODEL

Budget Allocation Model

In fiscal 2019, the District identified a need to make substantive changes to the prior Budget Allocation Model (BAM) and engaged the District Budget Advisory Council (DBAC) to do so, involving the college community throughout the process, and also including the District Strategic Planning Council.

The BAM was developed to allocate resources based on the following core principles:

- Fair Resource allocation decisions will be informed by objective, predictable, verifiable, and easily accessible data and will be made in an impartial and consistent manner
- Equitable Resources will be distributed in a manner that adequately supports the full array of programs offered at each college while ensuring compliance with statutory and regulatory requirements; efficient and strategic use of resources is expected, and inefficiencies will not be subsidized or supported.
- **Transparent** Resource allocation decisions will be made in an open and consultative manner with representative stakeholder groups and that it is simple, easy to administer and communicate as possible.

Beyond the core principles, additional principles were developed to guide the allocation of resources as shown in Exhibit G, including the alignment of resource allocation decisions with strategic plans for each entity, and more specifically scaling of the Guided Pathways initiative. The focus of the BAM has been on the general operating fund; however, the principles enumerated above can be applied to all resources of the District wherever applicable. The District is primarily funded through apportionment, the majority of which is based on the number of Full-Time Equivalent Students (FTES) served annually. This is still true under the new Student Centered Funding Formula (SCFF) wherein enrollment comprises 70% of the apportionment calculation. As such, the BAM was developed using the concept of "FTES as Currency" whereby each FTES generated has a value (or currency) that can be assigned based on a "standard" or "exchange rate" for each instructional program or discipline. In general, the BAM uses the FTES "Exchange Rates" that are developed to allocate resources to the colleges. Resource allocations by the colleges to their divisions will need to emulate this framework. The examples below demonstrate the "exchange rate" concept showing differing cost structures for two disciplines:

- Nursing (Higher Cost per FTES)
 - Low Student/Faculty Ratio
 - Dean of Nursing

BUDGET ALLOCATION MODEL (continued)

- Lab Technicians
- Lab Equipment
- Lab Supplies
- Program Accreditation Cost
- Classified Administrative Staff
- Clinical Sites
- Staff Travel
- Political Science (Lower Cost per FTES)
 - Higher Student/Faculty Ratio
 - No Lab Equipment, Supplies, or Technicians
 - Shared Dean with Other Disciplines
 - No Accreditation Costs

BAM Phase I uses four years of historical discipline cost per FTES information to develop the "exchange rates" per discipline. Multiple years are used to smooth out year-over-year fluctuations (equipment investment, full-time vs. part-time faculty, etc.) to create a three-year average "exchange rate". Each discipline is grouped into the following categories: 1) STEM; 2) Liberal Arts; 3) CTE; and 4) Unique (defined as a discipline that occurs at only one college). The "exchange rate" is then used to apply to projected FTES for that category. A similar methodology is used to calculate the non-instructional allocation. A more detailed explanation of the procedural steps is included in Exhibit H. In addition, the detailed calculation worksheets are included in Exhibit I.

The District implemented Phase I of the BAM in FY 2019-20; however, no expense budget allocation modifications were made as a result, pending refinement of the BAM in Phase II.

The second phase of the BAM implementation consisted of the following items:

- 1. **Simulation of Cost/FTES Impact** Assessing the exchange rate valuation for the costs/per FTES by modeling mean versus median costs and determining median as the rate, due to program cost fluctuations and outliers in a given year.
- 2. **Validation** Validating discipline cost per FTES data and testing for reasonableness and accuracy, such as ensuring proper coding of the disciplines, determining the correct course codes and adjusting, and realignment of cross-listed courses.
- 3. **Base Year** Using the most recent year's data for exchange rate was not conducive due to the timing of getting information to the colleges for planning purpose. Therefore, prior year data would be used for budget development.

BUDGET ALLOCATION MODEL

(continued)

- 4. **Escalation Factor** The model uses prior year data and applies an increase in STRS, contract and COLA to get to the budget year cost/per FTES. FY 2020-21 final budget uses FY 2018-19 median cost over a 2 year period to derive the FY 2020-21 rate.
- 5. **Entity Special Programs -** The model allocates non-specific revenue and apportionment. Therefore, it was necessary to isolate and identify college specific revenue/expense related programs to excluded from the revenue allocation.
- 6. **Beginning Balances** It was necessary to determine the beginning balances per entity in order to have a starting point.
- 7. **Reserves** Determine the treatment of the 5% reserve. It was decided that it remain centralized at the District level.
- 8. **Treatment of District Office** FY 2020-21 expenses related to the district office (excluding specific or special program costs) were distributed to the colleges based on budget year revenue ratio. Further discussions and decisions will be made in FY 2021-22.

The proposed final budget reflects BAM Phase II allocations to each entity and has been programed into the financial system.

Exhibit G

Budget Allocation Model Operating General Fund Principles

Principles

- 1. The Budget Allocation Model will be fair, equitable, and transparent.
 - a) Fair Resource allocation decisions will be informed by objective, predictable, verifiable, and easily accessible data and will be made in an impartial and consistent manner.
 - b) Equitable Resources will be distributed in a manner that adequately supports the full array of programs offered at each college while ensuring compliance with statutory and regulatory requirements; efficient and strategic use of resources is expected, and inefficiencies will not be subsidized or supported.
 - c) Transparent Resource allocation decisions will be made in an open and consultative manner with representative stakeholder groups and that it is simple, easy to administer and communicate as possible.
- 2. The goals and priorities for student success, equity, and access as articulated in the educational master/strategic plans of each college and the District Office will align with the goals included in the District Strategic Plan and strategic vision plan adopted by the California Community Colleges Board of Governors, including benchmarks and actions for measuring progress, and the Budget Allocation Model will align accordingly.
- The Budget Allocation Model will provide operational cost predictability and stability to support college and District
 Office strategic goals and objectives.
- The Budget Allocation Model will recognize and consider the variable costs associated with unique and common programs at each college and across the district.
- The Budget Allocation Model will recognize and consider the variable costs associated with new and proposed programs at each college and across the district.
- Operational structural balance will be maintained by ensuring that ongoing expenditures do not exceed ongoing revenues resulting in a positive fund balance.
- Ongoing expenditures will be funded with ongoing revenues, and one-time expenditures will be funded with one-time revenues, with exceptions only under rare circumstances.
- 8. Compliance with State, accreditor, and District reserve requirements will be maintained or exceeded, will be the first item funded in the BAM, and each college will maintain its own prudent reserve of no less than 1% of the previous years expenditures. Reserves in excess of the minimum reserve requirements will be established in an expenditure holding account to meet unexpected and/or unanticipated expenditures that arise subsequent to budget adoption.
- 9. Net prior year budget savings realized by each entity, exclusive of established net holding account balances and entity specific revenue/expenditure budget sources, will be retained by each entity upon approval of an expenditure plan linked to entity strategic planning priorities and once the minimum districtwide and college reserve requirements are met or exceeded.
- 10. Colleges are expected to achieve their annual Full-Time Equivalent Students (FTES) targets. If a college does not achieve its annual FTES target, they will have one year to correct the shortfall before a funding reduction is applied to the subsequent year allocation of part-time faculty and overload budgets.
- 11. The budget allocation model will be assessed annually.

Exhibit H

Riverside Community College District

BUDGET ALLOCATION MODEL

Procedural Steps – Phase II

Discipline Cost per FTES ("Exchange Rate") Calculations:

- 1. Direct Instructional and Academic Affairs, Student Services, Business Services, and "Other" Discipline Costs per FTES were grouped into four common categories: 1) STEM; 2) Liberal Arts; 3) CTE and; 4) Unique (defined as a discipline that occurs at only one college). Each college identified their "unique" programs, which are specific to the college and whose cost cannot be compared with other college disciplines (e.g. Game Development at Norco College, Dental Hygiene at Moreno Valley, Culinary Arts at RCC).
- 2. Discipline Costs per FTES for Direct Instructional Discipline and Academic Affairs, Student Services, Business Services, and "Other Costs" were calculated utilizing actual expense figures for fiscal year 18/19 (prior year data as the base year). Special Program costs (SPP) were excluded from the calculation.
- 3. Academic Affairs and Direct Instructional Costs were combined to derive the Instructional/Academic Affairs Discipline Cost per FTES and were weighted differently than the calculation for the non-instructional areas.

Determining Instructional and Academic Affairs Discipline Costs Per FTES

- Direct Instructional Cost was calculated by taking the total instructional cost per discipline and dividing it by the FTES generated by that discipline.
- Related Academic Affairs supporting costs were calculated by dividing the discipline FTES by the Colleges' grand total of FTES for a fiscal year to obtain a weighted percentage value, giving a percentage value to each discipline based on the FTES generated. The discipline FTES percentage value was applied to the total Academic Affairs cost to allocate to each discipline.
- Academic Affairs consists of the following: Academic Affairs (AA) Library, Accreditation, Honors, Institutional Effectiveness, Tutoring, Support Services, Academic Senate, Perkins/VTEA (xJV school code), and Dean Academic Support (or similar position).
- 4. The Non-Instructional areas, Student Services, Business Services and "Other", were combined to determine the total SS, BS & Other Discipline Cost per FTES.

<u>Determining Non-Instructional Discipline Cost Per FTES</u>

• Student Services, Business Services and "Other" was calculated by applying the same weighted value used to calculate Academic Affairs (by dividing the discipline FTES by the

Riverside Community College District

Colleges' grand total of FTES to obtain a weighted percentage value) giving a percentage value to each discipline based on the FTES generated. The discipline FTES percentage value was applied to the total SS, BS and Other cost to derive a cost per discipline per area.

- These three areas are comprised of the following:
 - Student Services (SS) Counseling, Student Activities, Evaluators, Financial Aid,
 A&R, Assessment, general funded categorical (EOPS, CalWORKs, DSPS, etc.),
 Student Financial Services, Intramural sports, Athletics, Health Services, Community
 Outreach, Job Placement, and International Students.
 - O Business Services (BS) Facilities, IT, Finance, Cashiers, Safety, and Police, Auxiliary Business Services (mailroom, warehouse, copy center, cashiers, etc.), and Food Service (GF expenses).
 - Other President, VP Planning & Development, Strategic Development, Dean Student Support & Services, Dean of Grants, CSEA, and CTA, grants (combined with GF).
- 5. The category "exchange rate" for Academic Affairs and Direct Instructional was then used to apply to projected FTES for each respective category.
- 6. The category "exchange rate" for Student Services, Business Services and "Other" was then used to apply to projected FTES for each respective category.
- 7. Finally, all costs (Direct Instructional, AA, SS, BS, and Other) were totaled per discipline. This grand total was divided by the Discipline Cost per FTES to calculate a total Discipline Cost per FTES.

Exchange Rate Valuation

- 1. Cost/per FTES rate per category for 1) STEM; 2) Liberal Arts; and 3) CTE was calculated based on the median rate between the three colleges. Median rate was used, due to program cost fluctuations and outliers in a given year.
- 2. Cost/per FTES rate per category for Unique was calculated based on actual rate for the respective college.

Escalation factor to Base Year FTES Cost

1. An escalation factor was applied to FY 2018-19 base year cost/per FTES to derive the budget year rate .The model uses prior year data and applies an increase in STRS, contract and cola to get to the budget year cost/per FTES. FY 2020/21 final budget uses FY 18/19 median cost over a 2 year period to derive the FY 2020-21 rate.

Budget Allocation Formula for Apportionment and Non-Specific Revenues:

1. Net apportionment and non-specific revenue allocations were calculated as follows:

Riverside Community College District

- o Total estimated revenues, less specific revenues, excluding set-aside and Special Project program costs.
- 2. The revenue allocation for STEM, Liberal Arts, and CTE, was calculated using Median FTES Cost, multiplied by the budget year target FTES, multiplied by the escalation factor.
- 3. The revenue allocation for Unique was calculated using the College Actual FTES Cost, multiplied by the budget year target FTES, multiplied by the escalation factor.
- 4. After allocating the revenue for Direct Instruction and Unique programs, the remaining net apportionment and non-specific revenue was allocated to the three Colleges to fund Student Services, Business Services, and "Other" costs. The revenue allocation for Student Services, Business Services and Other costs was calculated using the base year Districtwide median Cost per FTES multiplied by the estimated budget year target FTES, multiplied by the escalation factor. The revenue calculation exceeded allocated revenue, therefore a percentage of the total was applied to balance to remaining allocation.

Budget Allocation Formula for College Specific Revenues:

- 1. To determine the revenue amount to allocate, each entity identified the Special Project Programs (SPP) with specific revenue to be excluded from the calculation (e.g. associated revenue stream, or one-time expenditures, etc.).
- 2. After the exclusions, the remainder is apportionment and non-specific revenue to be allocated to the three colleges based on the formula calculation. The specific revenues are allocated to the specific College that has earned the revenue.
- 3. STEM, Liberal Arts, CTE and Unique disciplines have priority in the allocation process. After the instructional cost has been covered, the revenue balance is allocated to Business Services, Student Services and "Other".
