MAT 3 [Linear Algebra](#)

Rationale: The units have been increased from 3 to 4. The Course Content has been updated and expanded. 3 units of lecture will not provide sufficient time with students for complete coverage of MAT-3's objectives, outcomes, and augmented content. The mathematics discipline's students and our andragogy are constantly changing. We are seeing particular and recent changes as a result of our equity goals and new legislation (AB 705 and AB 1705). The Methods of Instruction and Methods of Evaluation were updated and expanded, in order to emphasize equity-promoting practices. It should be noted that these practices, such as group work and peer-to-peer teaching, require more class time than lecturing. In addition, there are other schools with 4-unit linear algebra courses with curriculum similar to ours.

MOV: Hold, 10/22/2024

NOR: Not Approved, 10/22/2024

RIV: Not Approved, 10/22/2024

Notes: There was a big discussion on this proposal. MVC faculty attended meeting and shared their support and input on the 3 to 4 units increase to this proposal. Committee members Curriculum Chair, mentioned Tech Review concerns and suggestion, an option, if really want more hours with students, instead adding a whole unit, can take away from current lecture hours and put them in a lab, and there will be more hours for the students.

Rachel Dyer moved to end debate. Second- J Lambert. Unanimous.

Rachel Dyer moved to approve with exception to update the rationale will be updated by next Tuesday; update rationale not because of today's age or what is written there, but on the basis what the faculty said about the prereqs, no longer being there for students needing that support, and this should have been made 24 years ago. Second: J Lambert. Vote 5- Yea; 6- Nay. Motion Failed.

N Sinigaglia motioned to HOLD, and will ask math faculty to ammend their rationale and bring back. Second- D Murrell. 10- Yea; 1- Nay- R Dyer. Approved to HOLD.

MAT 70B [Statistics for STEM](#)

Rationale: 1A is needed as a prerequisite because they need to know integration to transform from a pdf to a cdf distribution. The content learned in 70A is not required to be successful in 70B. 70A teaches programming in python and touches on machine learning topics while 70B is a statistics course that is taught using R. Removing 70A as a prerequisite opens the course to all STEM students, not just data science students. 70B transfers differently to some institutions for STEM students compared to Mat 12. CIS 1A was added as an advisory so students are familiar with programming concepts to help with learning R programming language in 70B.

H PSY 48 **Statistics for the Behavioral Sciences** Will be held for program modifications.

Rationale: PSY/SOC-48 is modified to be a 4-credit instead of a 3-credit hour course. ADT

H ADJ **Law, Public Policy and Society**
Rationale: The Community Colleges Pathway to Law School (Cal LAW) initiative launched in 2014 with a goal of enhancing opportunities and advancement in the legal profession for diverse populations, particularly those who have traditionally been underrepresented. More than 700 community college students are currently enrolled in the program statewide, with more than 250 graduated Cal LAW Scholars already. The initiative seeks to invest in the State's economic growth and global competitiveness through career education for the legal profession. At the core of the initiative is expanding diversity, equity, and inclusion by ensuring all students, regardless of race, age, economic status, or geography, gain exposure and confidence to pursue a Law career pathway. This initiative is intended to provide community college students, particularly women and people of color, with a direct path to law school, and to give those schools a pipeline of diverse students from across the state. Training students with 21st century skills is how the California Community Colleges will contribute to breaking the cycle of poverty and give community college students, their families, and their communities the opportunity for true economic mobility.

ADJ [Modern Policing](#)

Rationale: The Associate of Science in Modern Policing is a multi-disciplinary preparation degree for students who intend on becoming peace officers in the state of California and/or transferring to a California State University (CSU) or other four-year institution for a bachelor's degree in Criminal Justice or related majors. The intention for the Modern Policing Degree and the future of law enforcement is to be inclusive of the diverse perspectives of stakeholders, the 2020 Call to Action against systemic racism, the California Community Colleges system goals for equity as laid forth in the California Community Colleges Vision 2030, and the requirements of AB 89. This proposed degree for Modern Policing is the culmination of work from numerous stakeholders throughout our system to provide a prescriptive framework of courses to create a degree that leads to employment in the field. In addition to the content identified in AB 89 and AB 1122, courses and topics incorporated into the Modern Policing Degree curriculum contribute to an officer's critical thinking skills and emotional intelligence. Graduates with this degree will exhibit cultural competence, which is the ability to honor and respect the beliefs, language, interpersonal styles, behaviors, and lifestyles of those receiving and providing services. The Modern Policing degree is not intended to replace existing ADTs in Administration of Justice or local associate's degrees in administration of justice. It is intended to be a third option that includes elements of both types of degrees to satisfy the state's requirements in AB 89.
