Courses

Course Deletions

M N R Discussion

CIS 21C [Red Hat Linux System Administration I](#)

Rationale: This course is being proposed for deletion due to consistently low enrollment and minimal student demand over multiple semesters. The discipline reviewed the course and determined that it is no longer required to support current program requirements or student learning outcomes. Removing the course will help streamline the curriculum and better align course offerings with student needs and program priorities.

KIN A88 [Step Aerobics, Advanced](#)

Rationale: This course is at MVC only and this course does not impact any programs. We have not had any students enroll in this course in over 6 years. Affects our efficiency rate for enrollment, when no students enroll. Red flags us for no assessments for this course. We would be permanently deleting this course from the district, as we are the last campus to still offer Step Aerobics in our curriculum. We would still be able to offer KIN A86 Beginning Step, and KIN A87Intermediate Step.

MOV: **Approved, 4/28/2026** **NOR:** Info Item, 4/28/2026 **RIV:** Info Item, 4/28/2026

Updating the course ensures students gain relevant hands-on experience with modern Linux administration tools, system configuration, security practices, and troubleshooting techniques. This change strengthens workforce alignment, improves student preparation for industry certification, and supports career pathways in cybersecurity, networking, and system administration.
