Partnership Resource Team Outcomes and Progress-to-Date

May 4, 2021

Scaling Up – PRT (Partnership Resource Team)

- Institutional Effectiveness Partnership Initiative (IEPI) and a Partnership Resource Team (PRT) visited the district office three times to assist us in developing a district Innovation and Effectiveness Plan.
- Received a \$200,000 seed grant.
- Rationale
 - It is very complicated to extract data from Colleague
 - Build a data warehouse/reporting system for improved data access.
 - Align with Vision for Success
 - Identify a reporting tool for creating/publishing interactive data dashboards, aligned with the Vision for Success key performance indicators.

Progress Report on PRT Projects

Project 1: Establishing a districtwide data and storage and reporting system.

- ODS (Operational Data Store) is completed. Colleague data are moved to SQL server.
- We contracted with a vendor to design a data warehouse, which will integrate with the new ERP.
- A SQL server was set up to store all MIS data for researchers districtwide.

Progress Report on PRT Projects

Project 2: Evaluating and purchasing an enterprise platform to generate and publish interactive data dashboards.

- Power BI Premium is purchased and configured.
- Various interactive data dashboards are created and shared internally.
- Several high-level data dashboards will soon be published on the district website.

RCCD BI Goal: Getting actionable data to the users in a timely manner

TRADITIONAL PROCESS

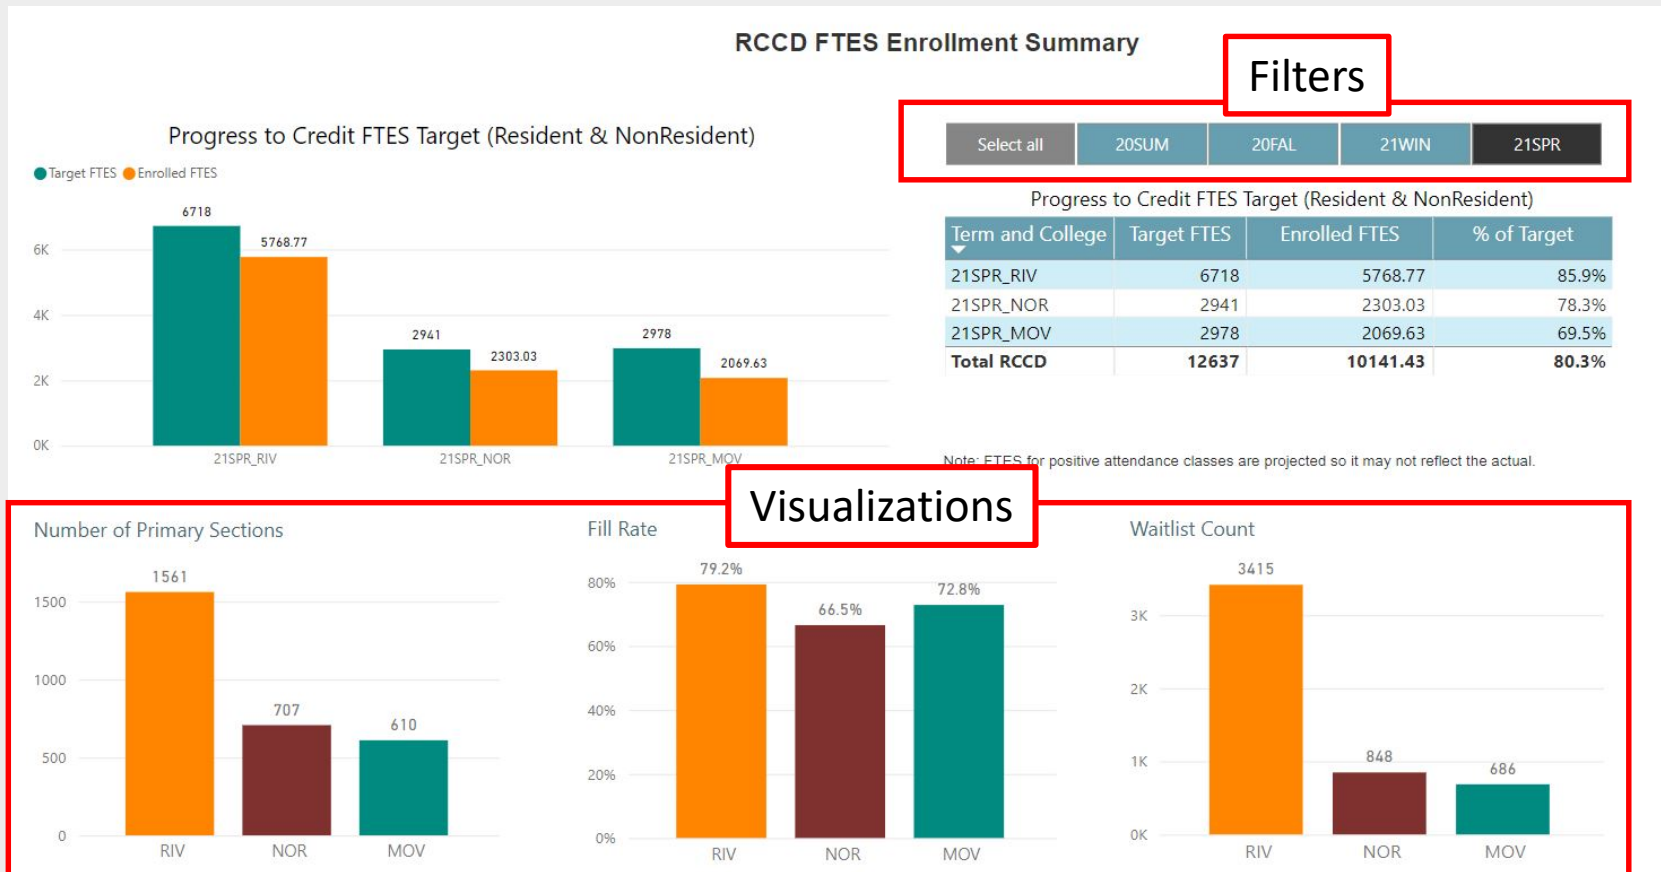

- Requestor questions researcher
- Researcher returns the result
- Original query modified, researcher queries data
- Complex questions may need many possible iterations, requiring multiple data pulls
- Eventually question is answered, or more in-depth study is needed

DASHBOARD PROCESS

- Requestor referred to dashboard
- Requestor selects options/filters to view
- Requestor can repeat the analysis as many times as necessary
- Eventually question is answered, or more in depth-study is needed
- Process is quicker, more user-directed

Interactive data dashboards allow users to select (or filter) the needed information and modify the results (visualizations) as requested.

Data Dashboards

- RCCD Guided Pathway Cohort Report
- Guided Pathways Transfer Destinations
- Student Educational Plans (*Under Development*)
- Ally Scores
- College and Career Access Pathways
- Enrollment Management Daily (*public facing, fewer data elements*)
- Non-Credit Enrollment Management
- Student Equity Course Success
- RCC Program Review Data
- RCCD Employment by Type
- RCCD Student Headcount
- RCCD Annual Employee Headcount
- RCCD Course Success Rates
- RCCD Awards Conferred
- Enrollment Management Dashboard (*for internal use, more data elements*)

- Public vs. Internal Dashboards
 - Public dashboards provide more general data.
 - Examples: Student Headcount, Course Success, Awards, Employee
 - Internal dashboards provide specialized data to RCCD faculty, staff, administrators and classified professionals for planning and decision making.
 - Examples: Guided Pathways cohorts, Transfer Cohort, Ally Scores, Enrollment Management Dashboard

Data Governance of Power BI Dashboards

- Goal of data governance is to increase data engagement and communication in a secure way with transparency and collaboration.
- With more dashboards being made throughout the district, data governance procedures are being developed to ensure data security while allowing for data sharing and collaboration.

Data Security

- Guarding the data privacy of the students is our highest safety concern.
- Safeguarding practices
 - Removing personally-identifiable student information prior to upload
 - limiting downloads of data to summary-level tables
- Working with Dyntek, a data security organization to help us implement best practices for dashboard data security.

Progress Report on PRT Projects

Project 3: Developing effective data coaches to promote and facilitate a culture of evidence for data-driven decisions to improve student learning and institutional effectiveness.

- All three colleges have developed data coaching programs.
- As of March 31, we have sponsored trainings of 28 faculty data coaches.

Going Forward

- As the district and the colleges move forward with the creation of data dashboards, this will improve information access and the ability to use data to help inform strategic decisions and operations.
- By developing these dashboards, we will increase our internal capability to meet ever-growing information demands and support more data-informed decision making.
